

let n = "name"
 let stream = "CSE"

let user = {

name: shrik
 age: 21
 place: delhi
 ECE: true
 }

name: Nidhi
 age: 23
 place: delhi
 CSE: true
 }

user.name → Nidhi
 user["name"] → Nidhi

user.name
 user.stream → ud

user["stream"]
 user["CSE"]
 true

a = 5
 a + b = 10
 5 + b = 10
 b = 5

stream = "CSE"

JS resolves the value
 JS computes the result and then processes my answer
